

Ćwiczenie nr 4: Analityczne i symulacyjne rozwiązanie równania 1.rzędu

1. Schemat blokowy z Simulinka

$$a_1 \dot{x}(t) + a_0 x(t) = bu(t)$$

2. Rozwiązania – stałe wymuszenie ($u_0 \neq 0$, $du=0$), różne warunki początkowe

a) $\dot{x}(0)=0$

b) $\dot{x}(0)=2/3$

c)x(0)=0

d) $x(0) = 6$

Wnioski:

Rozwiązania symulacyjne pokrywają się z rozwiązaniami analitycznymi co dowodzi poprawności ich rozwiązania.
